

Om Waghmare

Full Stack Developer

☎ +91 9370440769 | ✉ omrajewaghmare6969@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 🌐 Portfolio

Professional Summary

Full stack developer who has built and deployed three web applications with the MERN stack and Next.js, including an AI-powered README generator using Google Gemini and a college discovery platform built on PostgreSQL and Prisma with 42 unit tests. Winner of the 5X AI Prompt Battle. Comfortable across the stack, from REST API design and authentication to responsive, polished user interfaces.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, Java, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, React Router, Zustand, Axios, Bootstrap

Backend & Databases: Node.js, Express.js, Next.js Route Handlers, MongoDB, Mongoose, PostgreSQL, Prisma

APIs, Auth & Testing: REST APIs, JWT, bcrypt, Zod, Vitest, GitHub REST API, Google Gemini API

Tools & Deployment: Git, GitHub, Docker, Postman, Vite, npm, Figma, Vercel, Render

Projects

CampusCompass – College Discovery & Decision-Making Platform

Live Demo | GitHub

Next.js, React, TypeScript, PostgreSQL, Prisma, Tailwind CSS, Zustand, Zod, JWT, Vitest

- Engineered a full-stack college discovery platform with server-side search, filtering, sorting and pagination, detailed college profiles with course and placement data, and side-by-side comparison.
- Designed a deterministic admission predictor that classifies colleges as SAFE, MODERATE or REACH from a student's exam rank and historical cutoff data.
- Implemented secure authentication with bcrypt password hashing and signed JWT session cookies, powering saved colleges, reviews and Q&A discussions.
- Wrote 42 unit tests with Vitest covering the predictor and other critical business logic.

README AI – AI-Powered GitHub README Generator

Live Demo | GitHub

React.js, Node.js, Express.js, MongoDB, Mongoose, Google Gemini API, GitHub REST API, JWT

- Built a MERN application that analyzes a public GitHub repository's structure, dependencies and configuration files, then generates a professional README using Google's Gemini API.
- Designed Express.js REST APIs with MongoDB/Mongoose for repository analysis and README management, secured with JWT authentication and bcrypt password hashing.
- Integrated a live Markdown editor with preview so users can refine, save and download the generated documentation.

AI Orbit Tools – AI Tools Discovery Platform

Live Demo | GitHub

React.js, Node.js, Express.js, MongoDB, Mongoose, Tailwind CSS, React Router, Vercel, Render

- Developed a full-stack AI tools directory with search, category, pricing and rating filters, sorting, pagination and responsive grid/list views.
- Implemented Express.js REST APIs for tool listings, detail pages, reviews and related-tool recommendations.
- Added favorites, review interactions and complete loading, empty and error states; deployed the frontend on Vercel and the backend on Render.

Experience

Data Science Intern

June 2025 – July 2025

Cognifyz Technologies (Remote)

- Cleaned, preprocessed and analyzed a restaurant dataset of 9,500+ records using Python, Pandas and NumPy.
- Performed exploratory and geospatial analysis to study how pricing and online delivery affect customer ratings.
- Engineered features and built regression models (Linear Regression, Decision Tree, Random Forest), presenting insights through Matplotlib and Seaborn visualizations.

Education

B.Tech in Information Technology

2022 – 2026

Pimpri Chinchwad College of Engineering (PCCOE), Pune

Achievements & Certifications

- Winner** – 5X AI Prompt Battle (AccioJob): built DineSync Elite, a restaurant discovery and booking website, using only five AI prompts and no manual code.
- Runner-up** – Spectrum Tech Event, PCCOE.
- Solved 100+ DSA problems on LeetCode | 5-star Python badge on HackerRank.
- Meta Front-End Development (Coursera) | Programming with Java (Infosys Springboard) | DBMS (Scaler)
